

12/15

Paul Kowalek

Will send TP data to Brian Zdenek  
Collection system problem → excursion to

starters 2 month ago w/ Metzler

put in tank &  
Metzler

brought down to 4 g/l/min

improvement result, but not as good as hoped

problems w/ DO/mixing → <sup>1st</sup> smaller tank not as worse as hoped  
tank, seem to see better result  
Metzler (to 2nd Metzler)

Optimistic that w/ Metzler pre-treatment — hopefully  
improved by spring — think they should be able

I sent Paul an email w/ Brian's info request / email
